

Cover

Inside

A white speech bubble with a black outline and a grey rectangular placeholder inside. It contains the text 'SEE. UNDERSTAND. ACT.' in blue, bold, sans-serif font.

WorkSmart™ changes everything.

WorkSmart™ Powered by ImageRight® works with the information in your management system to help you see through the “walls” within your operation, perceive opportunities and problems, and act in record time. WorkSmart cuts the number of steps it takes to get things done, allowing you to spend more time with clients, and less time doing paperwork.

Any management system can give you “workflow.” Only WorkSmart delivers up-to-the-second information for better, smarter decision making.

WorkSmart lets you read, use, and edit complete client files from virtually anywhere.

It’s true. Now you can locate, organize, print, fax and e-mail right from your desktop. And WorkSmart is easy to use. It reduces duplicate data entry, improves accuracy, and reduces E&O exposure.

Help your agency thrive, with **WorkSmart.**

This device complies with Part 15 of FCC Rules. Operation is subject to following 2 conditions: (1) device may not cause harmful interference, (2) device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes/modifications to unit not expressly approved by the party responsible for compliance could void user's authority to operate equipment. NOTE: This equipment has been tested, found to comply with limits for Class B digital device, pursuant to Part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference in residential installation. Equipment generates, uses, can radiate radio frequency energy, if not installed and used in accordance with instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If equipment does cause harmful interference to radio/TV reception, determined by turning the equipment off/on, user can try to correct interference by 1 or more of the following measures: Reorient/relocate receiving antenna; increase separation between equipment & receiver; connect equipment into outlet on circuit different from that which receiver is connected; consult dealer/experienced radio/TV technician for help. Shielded cables must be used with unit to ensure compliance with Class B FCC limits. Printed and assembled in China.
